

CAERUS SPLINTS

A FAST AND EFFICIENT REPLACEMENT FOR TRADITIONAL SPLINTS AND CASTING KITS.

Low heat thermoformable plastic comes in a variety of sizes and becomes fully moldable after 3-5 minutes in the Slim Line Heater. Once pliable, simply form to the extremity, secure with vet wrap or equivalent for 4 minutes until the splint is rigid. Splint with the Caerus advantage and be on your way.

- EASY TRIMMING
can be custom trimmed with scissors
- LIGHTWEIGHT
- RADIOLUCENT
- CLEAN, DRY APPLICATION
without mess and moisture

One clean, dry moldable splint eliminates the need for multiple stabilization solutions.
